introducing!

The Data Privacy Compliance: MasterClass Edition

This is the fastest implementation approach to complying with the requirement of the Data Privacy Act (DPA) of 2012. For the past 5 years, we have sourced and found the most efficient and effective approach to implementing DPA2012 compliance: quickly and with minimal reliance on expert complexity. This is an upgrade from the Full-Build model introduced last year. This masterful re-engineered approach brings down your assessment and compliance from 5 weeks to within 2 weeks. That is, assuming your team comes "ready-to-workshop" and not just to listen and learn.

Send at least 2 or 3 people from your organization. It will be worth it.

After this MasterClass training, your team will not only have assessed your current compliance condition (which will cost you no less than half a million pesos if done by an independent assessor) but will bring home a fully-documented, PIA Report and a completed Privacy Management Program (PMP) governance manual.

For those eyeing compliance with the ISO 27701 PIMS and the EU GDPR, this workshop puts you right in the doorway, ready to be let in. Are you getting a complete data privacy compliance and implementation program for less than Php100,000? Yes, this workshop experience is about the best thing that can happen to your struggle at compliance the past 3 years!
